ARCAS-Intellexus Workshop Collaboration Vision and Plan

**November 6–8, 2024
Namdroling Monastery, Mysore, South India**

The workshop focuses on developing a collaboration scheme between the ARCAS project, which is devoted to the study of early literature of the rNying-ma tradition, and the ERC Synergy Intellexus project whose goal is to map the Indic and Tibetan Buddhist text corpora. The two projects seek to present the bibliographical material compiled by ARCAS within the framework of the Intellectual Ecosystem Database currently being developed by Intellexus. The database will enable a better mapping of the text corpora, including filtering and visualization options, for which such bibliographical data is very valuable. The workshop will take place in Namdroling monastery, Mysore, South India during November 6–8 and will be led by Prof. Dorji Wangchuk, in collaboration with Dr. Orna Almogi.
