Working Visit: Orna Almogi & Dorji Wangchuk visit RUNI

August 31 – September 12, 2025

Orna Almogi and Dorji Wangchuk from the Intellexus UHH team visited the RUNI team for a working visit from August 31–September 12, 2025. During their stay, they conducted numerous fruitful meetings and working sessions with various RUNI team members. The main goals of their visit were (1) supporting the final preparations for the upcoming Hackathon (September 13–18, 2025), including fine-tuning task definitions and objectives, particularly in view of the short- and long-term goals of the Intellexus project in general and the two Tibetological groups focusing on canonical and paracanonical material in particular; (2) finalizing and submitting the panel proposal and individual abstracts for the IATS 2026 conference; and (3) advancing the development of the Intellexus Platform, including both the Intellectual Ecosystem Database and the Text Database.
